

## Goal Setting & Tracking Portal

### **Enterprise Performance & Goal Management System**

**Submitted By:** Gagandeep Singh

**Technology Stack:** Next.js 14, TypeScript, Prisma ORM, NextAuth v5, Neon PostgreSQL, Tailwind CSS, Vercel

**Project Type:** Enterprise Goal Management & Performance Tracking Portal

---

### **Project Overview**

The Goal Setting & Tracking Portal is a production-ready enterprise web application designed to streamline organizational goal management, employee performance tracking, managerial approvals, quarterly progress updates, reporting, and audit monitoring.

The platform enables Employees, Managers, and Administrators to collaborate within a structured workflow environment while maintaining secure role-based access control and transparent performance visibility.

The system was developed using modern full-stack technologies including Next.js 14, Prisma ORM, NextAuth v5 authentication, Neon PostgreSQL database, and deployed on Vercel.

The application focuses on:

- Organizational goal alignment
  - Employee performance tracking
  - Quarterly review workflows
  - Manager approval systems
  - Audit logging and monitoring
  - Secure authentication and authorization
  - Enterprise-grade role management
- 

### **Live Deployment**

## Login Credentials

The portal includes pre-configured demo accounts for all primary user roles. These accounts are provided to help evaluators explore the complete workflow, approval hierarchy, and role-based access system of the platform. Each role has dedicated permissions and access to different modules within the application.

### 1. Admin Access

**Role Description:**

Provides complete administrative control over the platform including user management, cycle management, audit logs, reports, system monitoring, and organization-wide controls.

**Email:**

admin@company.com

**Password:**

Password@123

### 2. Manager Access

**Role Description:**

Provides access to managerial workflows including employee goal approvals, quarterly reviews, escalation handling, team progress monitoring, and performance tracking.

**Email:**

manager@company.com

**Password:**

Password@123

### 3. Employee Access

**Role Description:**

Provides access to employee functionalities including personal goal creation, quarterly updates, shared goals, and individual performance tracking.
